

Parent Information API Documentation

This API endpoint retrieves information about a parent based on their email.

Request

- **HTTP Method:** GET
- **URL:** <base_url>/parent/info
 - production dns: <https://www.coralacademydemo.com/>
 - staging dns: <https://frontend-g03j.onrender.com/>
- **Query Parameters:**
 - **email** (string, required): The email address of the parent.

`https GET /parent/info?email=parent@example.com`

Response

The API response will contain information about the parent with the provided email.

Sample Success Response:

```
{
  "email": "test@gmail.com",
  "parentName": "abc",
  "childName": "xyz",
  "childAge": "12",
  "commPref": [
    "WhatsApp"
  ],
  "phoneNumber": "+91888888888",
  "knowabout": "Friends and Family",
  "additionalInfo": ""
}
```

Note: If the provided email does not match any parent records, the API will return an empty object ({}).
